

## OMNI JAW 5

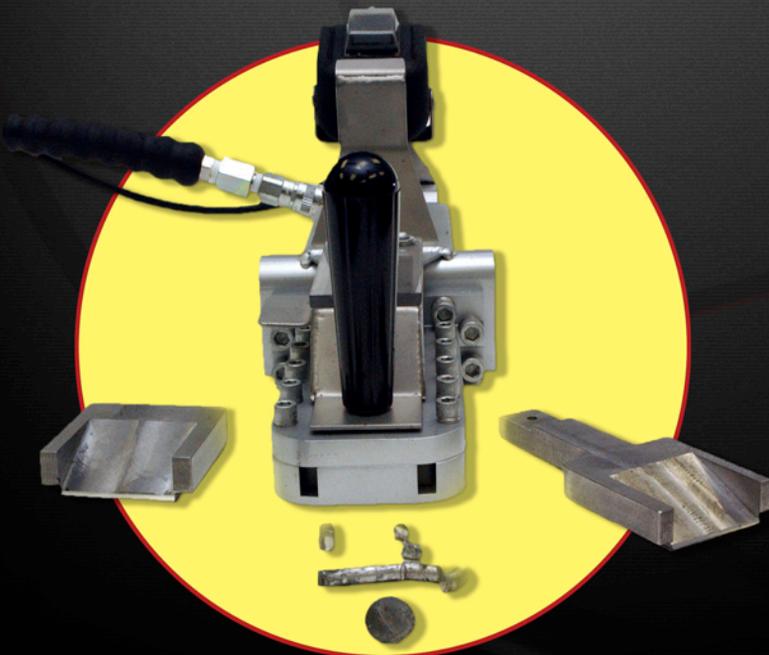

*The Omni Jaw 5 is a high-powered hydraulic tool that can generate up to 5 tons of force on the cutting jaw. An electric trigger placed ergonomically on the handle actuates it. The longer the momentary trigger is held open, the higher the force it generates. This ability allows the tool to use only a minimum amount of power required to cut. After release of the trigger, the system automatically resets, and the cutting jaw returns to the open position.*

### BENEFITS

- Lightweight (18 pounds)
- 1:500 weight-to-force ratio
- Interchangeable jaws cut, punch and shear
- Can be modified to required specifications
- Bites off bolt heads and nails protruding through the surface

### FEATURES

- 4140 steel allow machined body and cutting jaw
- S7 high-impact tool steel machined cutting blades
- Stainless steel jaw guards and handle frame
- 1/4" Lexan transparent shield
- Ultra Alloy Steel bolts

### APPLICATIONS

- Demolition and dismantlement of buildings and equipment
- With an interchangeable jaw, the Omni Jaw 5 can be used to cut bolts, punch or shear

### PATENT STATUS

- Patent issued
